API Usage Budget Proposal

RADIX AI Content Planner — Recurring API Costs for Finance Approval

01 EXECUTIVE SUMMARY

The RADIX AI Content Planner automates social media content creation across our portfolio of **13 active clients**. The content team currently dedicates **600+ manual hours per month** to content planning, copywriting, visual direction, and scheduling. This tool compresses that workflow to minutes per client by leveraging AI-powered text generation, image creation, video production, and visual reference search.

API costs represent the **only recurring operational expense** for the tool. All infrastructure runs locally within the existing Radix technology stack. No additional headcount, hardware, or software licenses are required.

> **Total Annual Budget Request:** $854 – $996 depending on team size (6–7 users), inclusive of a 15% cost buffer for API pricing fluctuations. This represents a **241x return on investment** against current manual labor costs.

02 API SERVICES OVERVIEW

The Content Planner integrates five API services across text, image, video, and reference search capabilities:

SERVICE	PROVIDER	MODEL	USE CASE	PER-UNIT COST
Text Content Generation	Anthropic	Claude Opus 4	Generate 18 content pieces from client brief	$5/M input tokens $25/M output tokens
Text Analysis & Keywords	Google	Gemini 2.5 Flash	Keyword generation, prompt analysis	$0.30/M input $2.50/M output
Image Generation	Google	Gemini 3.1 Flash Image	Visual references, social media images	$0.067/image (1K resolution)

SERVICE	PROVIDER	MODEL	USE CASE	PER-UNIT COST
		(Nano Banana 2)		
Video Generation	Google	Veo 3.1	Short-form video content (10s)	$1.50/video
Visual Reference Search	Wikimedia Foundation	Commons API	Stock photo references for designers	FREE (500 req/hr)

03 USAGE ASSUMPTIONS

6–7
ACTIVE USERS (SOCIAL MEDIA TEAM)

~2
CONTENT BRIEFS PER USER / MONTH

18
CONTENT PIECES PER BRIEF (36/USER/MO)

~20
AI-GENERATED IMAGES PER USER / MONTH

~5
AI-GENERATED VIDEOS PER USER / MONTH

~70
VISUAL REFERENCE LOOKUPS PER USER / MONTH

04 MONTHLY COST BREAKDOWN

Scenario A — 6 Users

LINE ITEM	QUANTITY	UNIT COST	MONTHLY TOTAL
Claude Opus 4 — Content Generation	12 briefs (6 users × 2)	$0.73/brief	$8.76
Gemini 2.5 Flash — Text Analysis	12 briefs	~$0.005/brief	$0.06
Gemini 3.1 Flash Image — Image Generation	120 images (6 × 20)	$0.067/image	$8.04
Veo 3.1 — Video Generation	30 videos (6 × 5)	$1.50/video	$45.00
Wikimedia Commons — Visual References	~420 lookups	FREE	$0.00
TOTAL MONTHLY (6 USERS)			**$61.86**

Scenario B — 7 Users

LINE ITEM	QUANTITY	UNIT COST	MONTHLY TOTAL
Claude Opus 4 — Content Generation	14 briefs (7 users × 2)	$0.73/brief	$10.22
Gemini 2.5 Flash — Text Analysis	14 briefs	~$0.005/brief	$0.07
Gemini 3.1 Flash Image — Image Generation	140 images (7 × 20)	$0.067/image	$9.38
Veo 3.1 — Video Generation	35 videos (7 × 5)	$1.50/video	$52.50
Wikimedia Commons — Visual References	~490 lookups	FREE	$0.00
TOTAL MONTHLY (7 USERS)			**$72.17**

05 ANNUAL PROJECTIONS

SCENARIO	MONTHLY	ANNUAL (12 MO)	+ 15% BUFFER	TOTAL BUDGET REQUEST
6 Users	$61.86	$742.32	$111.35	**$854.00**
7 Users	$72.17	$866.04	$129.91	**$996.00**

07 BUDGET APPROVAL

This document requests approval for a recurring annual API budget as outlined in Section 05. Signatories below confirm review and authorization of the stated expenditure.

Notes & Disclaimers

- All prices quoted as of April 2026. Anthropic and Google may adjust pricing at any time; the 15% budget buffer accounts for potential increases.
- Free-tier services (Wikimedia Commons) operate with generous rate limits (500 requests/hour) well above projected usage.
- API keys are stored securely within the application and access is restricted to authorized content team members only.
- No client data is stored by third-party API providers. All content generation is stateless and session-based.
